

## ENERGY POLICY

In line with our vision of "To be a globally recognized rope and wire brand that increases the welfare of all its stakeholders", we prioritize the continuous improvement of our Energy Management System (EnMS) and Energy Performance in all our activities, while offering our reliable and high-performance products that benefit all stakeholders with an understanding of innovation, creativity and continuous development. In line with this purpose;

- ❁ To establish and review the goals and objectives of the ENYS in order to improve our energy performance, and to provide the necessary information and resources to achieve these goals,
- ❁ To meet the applicable legal and other requirements regarding energy efficiency, energy use and energy consumption,
- ❁ To support the supply of products and services that contribute to energy efficiency,
- ❁ To communicate effectively with all stakeholders, suppliers and all relevant parties in order to raise awareness about ENYS and Energy efficiency,
- ❁ To ensure the continuity of platforms where our employees can share their suggestions for improvement in energy efficiency,
- ❁ To support design activities aimed at improving energy performance,
- ❁ To prioritize energy efficiency in planned investments, new products or new processes to be developed,
- ❁ To document the necessary procedures for the sustainability of the Energy Management System,
- ❁ In order to raise awareness about energy efficiency, we are committed to organizing training activities for our employees with the philosophy of continuous development.
